

WEB303 Assignment 7

Chapter 11

Select an famous individual for your project. They can be a celebrity, athlete, politician, or an historical figure. They can not be fictional. Use sources such as Wikipedia that allow you to reuse their content. Give credit to your sources.

Do not choose the same person as your classmate.

Create a web page with both an accordion AND a tabbed section with information about this person. Content can be outside of the accordion/tabs so you can use them in a practical way. They do not need to dominate the page.

Write your code from scratch. You can use normalize (necolas.github.io/normalize.css), skeleton (getskeleton.com), or bootstrap (getbootstrap.com) as a starting point if you like. Using jQuery is required but you cannot use jQuery UI.

The page must include:

- jQuery (but **NOT** jQuery UI)
- at least one accordion with at least 3 sections
- at least one tabbed section with at least 3 sections
- photos
- text content
- attribution of your sources

Create your accordion and tabbed sections using jQuery and the techniques in chapter 11.

Due:

Sec 1: Tuesday, Nov 3

Sec 2: Monday, Nov 2

Files are due before the start of class. Assignments will be marked in person during class.

Marking: Submit a zip file containing a folder of your files. Name the folder with your name.

This assignment is out of 10:

- Valid HTML including form: 2
- CSS to display form nicely: 2
- Inclusion of required points: 6
