

WEB303 Assignment 8

Chapter 11: Content Panels

jQuery Plugin

Create a jQuery plugin from one of the new content panels in chapter 11 (other than the accordion or tabbed panel). Use it in a webpage. This can be the webpage from the previous assignment or a new page.

The page must include:

- jQuery (but **NOT** jQuery UI or other jQuery plugins)
- JavaScript code to create a plugin (your own plugin code although you can copy and modify the authors panel code).
Select one of the panels from this list:
 - Modal Window
 - Photo Viewer
 - Responsive Slider
- at least one image in your panel
- text content
- attribution of your sources

Create your plugin and panel using jQuery and the techniques in chapter 11.

Due:

Sec 1: Friday, Nov 13

Sec 2: Wednesday, Nov 11

Files are due before the start of class. Assignments will be marked in person during class.

Marking: Submit a zip file containing a folder of your files. Name the folder with your name.

This assignment is out of 10:

- Valid and meaningful HTML: 2
- CSS to display page nicely: 2
- Inclusion of required points: 6
