

# WEB303 Assignment 11

## Chapter 13: Form Enhancement & Validation

### Form Enhancement

We will implement the author's examples in a page for practice. Create a web page which contains a form with the following information:

1. Text field
  - Name - first and last names in one field
2. Date
  - Birthdate (or some other date)
  - in the format YYYY-MM-DD.
3. Number field
  - Age or something related to your page
4. Password
  - Add a checkbox to show/hide the password
5. Checkboxes
  - Favourite classes (or some other subject, at least 4 items)
  - list each of your classes this semester. Add an "All" checkbox to select them all.
6. Radio Buttons
  - Why do you like these classes? (Or some other question relating to your page.)
  - have at least four choices plus "Other". When Other is selected a text box will appear for details.
7. Select list
  - The content of the list will change and relate to the radio button selected above.
8. Text Area
  - A short description of your favorite class or something related to your content.
9. Submit Button
  - Disabled until something is entered in the Name field.

The page may include:

- jQuery

Create your form using the techniques in chapter 13.

### Due:

Sec 1: Friday, December 4

Sec 2: Wednesday, December 2

Files are due before the start of class. Assignments will be marked in person during class.

Marking: Submit a zip file containing a folder of your files. Name the folder with your name.

This assignment is out of 10:

- Valid and meaningful HTML: 2
- CSS to display page nicely: 2
- Inclusion of required points: 6
